GLOBILE PROJECT

TESTING BACK SERVICE CONSOLE

USER´S MANUAL

1.-Accessing the console.

To access the console you need a corporative credential, so you must login in ISBAN Corporative Login in order to generate a valid token. This token grants access to the console.

I imagine that we haven´t corporative users, so we will use an alternative way to access, this URL with a "special token".

https://consolades.branchlocatorsb.p.azurewebsites.net/login?authenticationType=token&token=QjQ2NTc5NTY2NTAxMDUwMDk5QkJEQjNBIzE4MC4xMDEuMTE2LjkjMTQ2Mjg4MDk5OTc2NiNQRDk0Yld3Z2RtVnljMmx2YmowaU1TNHdJaUJsYm1OdlpHbHVaejBpU1ZOUExUZzROVGt0TVNJL1BqeDBBiMnRsYmtSbFptbHVhWFJwYjI0K1BIVnpaWEpKUkQ1NFNWTXdNVGcxTkR3dmRYTmxja2xFUGp4aGJHaGjejU0U1ZNd01UZzFORHd2WVd4cFlYTStQRzVoYWldVK1QzSm5ZVzVsY204Z1RXRmtkV1Z1Ynl3Z1NtOXpaaU0JOWVc1MVpXdzhMMmJWoYldVK1BDOTBiMnRsYmtSbFptbHVhWFJwYjI0KyNERVNlZGUvQ0JDL1BLQ1M1UGFkZGluZyN2MSNJbnRyeUUlTQkFOREVTI05PVCBVU0VEI1NIQTF3aXRoUlNBI3g2UjJrdW5SQ2MvWlpzQ0Z0UHBGYzBpMndjbkFoOTc5ZWtReSt4a1NoV1cvNmFBS0xIbXlFOTJDZHZseFFtQXB5WFlJazI1bXllRTFYdk94MktWNC9ENHlTS2E2bDdzeG11VGFkSFdvZ1V5YWhRVkpYWllwWnN1TnFxZndiWm1Kc2VNWXVYa0RmQk1IcXQ3UWpHM1BEN2RaOWtzQi90bXMyNHFHHb0hVODB3Yz0=

With this URL you can access like if you have a valid corporative user. After entering you must see something like this:
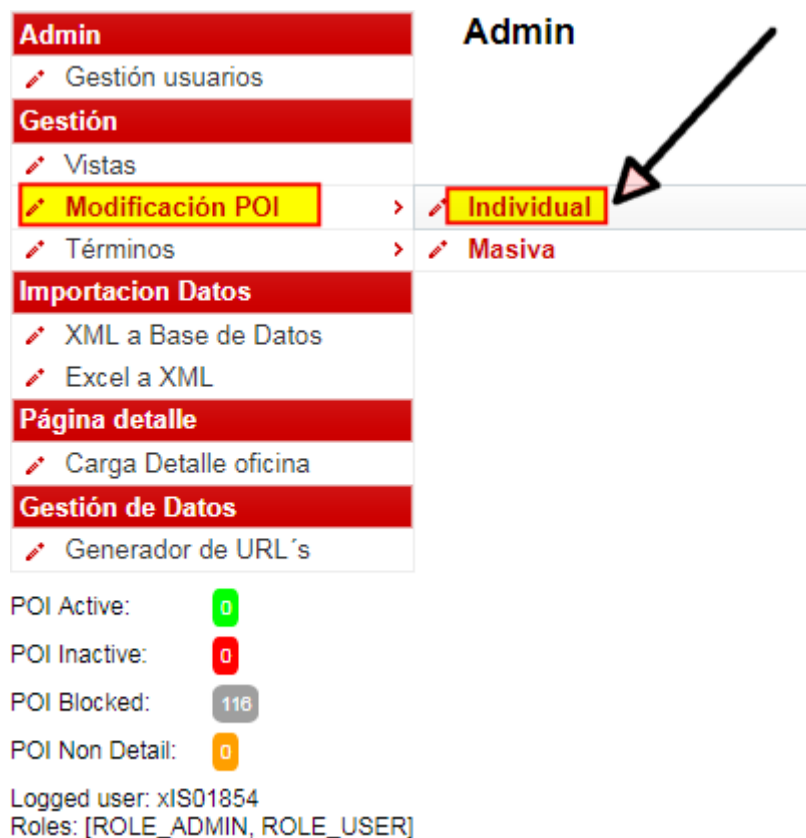

Now, you are in the administrative area and from here you will be able to do a lot of operations over the POI.

2.- Deleting a single POI.

In order to delete a single POI you must follow the nexts steps.

2.1.- Locate the POI.

To locate a POI we will use the following options in the left menu.

The next screen show us a form where we can perform the search of our POI. It´s like this:

You can search your POI with the unique code, using the Código box, or you can search using free text from the POI like address, phone number, city, zipcode, etc.

Let see an example searching with address, for example "Serrano" street.

The result must be something like this

Edit POI

Well, suppose we are looking for number 92 of Serrano Street. Next step it pushing the pencil button.

After pushing it the POI is loaded and we can see a big form with a lot of fields. Don't´t worry, maybe later we will come back to study them. Now we are here to delete de POI, so you can see a button just below the POI Detail title.

2.2 Deleting the POI.

If you push this button you might receive a pop-up warning message like this

The message says " Are you sure to delete the POI?. This action can´t be undone"

If you push "Aceptar" the POI will be deleted and a green confirmation message appears in the window.

In other case nothing happens and you return to the form.

You can check if the POI deleted is in the repository in the search form or if you have the possibility of check in the mobile app, this POI may not appear anymore.

2.3 Deleting a set of POI´s

You will be able to delete more than one POI using the functionality of delete in the list of results.

Let see how to do it. We can use the same search used in the previous step.

Edit POI

Formulario de búsqueda					
Código					
Full Text	Serrano	🔍	➕	Eliminar Seleccionados	Seleccionar todos
Status:	ACTIVE ▼				
POI's por página:	25 ▼				

Code	Name	Status	Toolbar	Eliminar
Santander_ESP_ES_Of0151	SERRANO, 57	ACTIVE	✏️	☐
Santander_ESP_ES_Of1803	SERRANO, 57	ACTIVE	✏️	☐
Santander_ESP_ES_Of6139	EDIFICIO C.S.I.C. SERRANO, 113	ACTIVE	✏️	☐
Santander_ESP_ES_Of6958	C/ SERRANO, 51	ACTIVE	✏️	☐
Santander_ESP_ES_Of0658	C/ Serrano, 92	ACTIVE	✏️	☐

Imagine you want to delete all the POI´s in Serrano Street. You can do it in two ways:

- Selecting every check in the column "Eliminar".
- Pushing the "Seleccionar todos" button.

In both cases the result must be like this:

Edit POI

Formulario de búsqueda					
Código					
Full Text	Serrano	🔍	➕	Eliminar Seleccionados	Desmarcar todos
Status:	ACTIVE ▼				
POI's por página:	25 ▼				

Code	Name	Status	Toolbar	Eliminar
Santander_ESP_ES_Of0151	SERRANO, 57	ACTIVE	✏️	☑
Santander_ESP_ES_Of1803	SERRANO, 57	ACTIVE	✏️	☑
Santander_ESP_ES_Of6139	EDIFICIO C.S.I.C. SERRANO, 113	ACTIVE	✏️	☑
Santander_ESP_ES_Of6958	C/ SERRANO, 51	ACTIVE	✏️	☑
Santander_ESP_ES_Of0658	C/ Serrano, 92	ACTIVE	✏️	☑

The next step is pushing the "Eliminar Seleccionados" button and you receive a warning pop-up message.

Edit POI

◀◀ ▶▶

If you push the blue "Aceptar" button the selected POI will be deleted. If you cancel the operation nothing happens.

To check if POI´s has been deleted you can return to the search form and perform the same search again or if you can use de mobile app or the branchlocator web, the POI´s may not be loaded in the map.
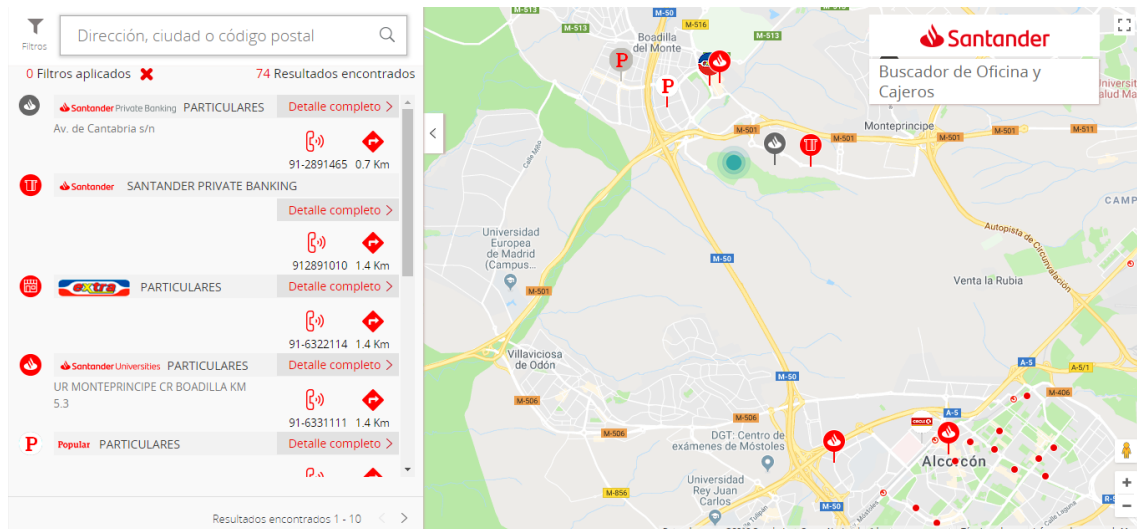

3.- Where can I see the POI´s in a map

If you haven´t the mobile app or this app is reading data from another source, you can use the web front to check the operations in the console.
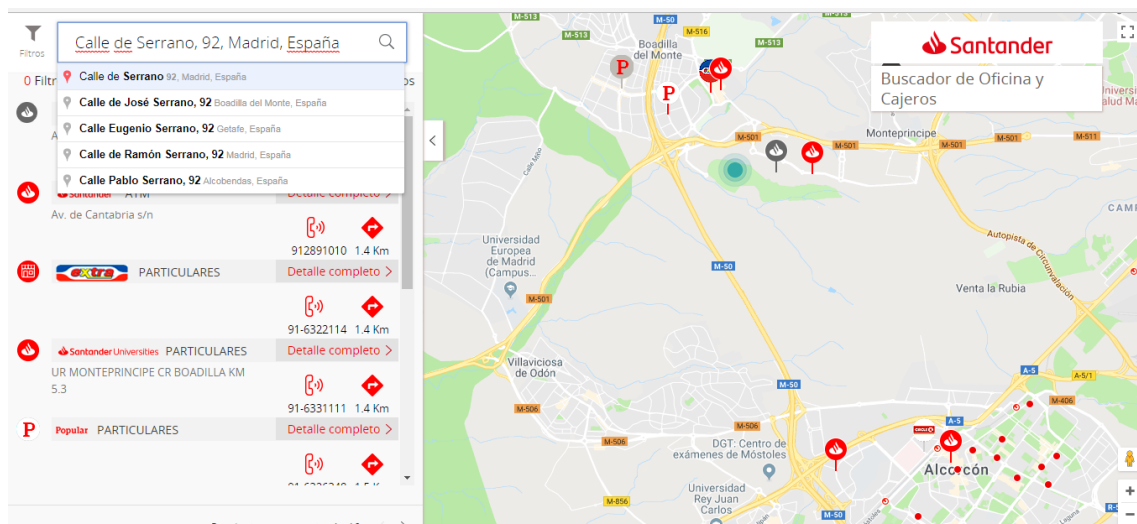

The URL to access is the next:

https://web.branchlocatorsb.p.azurewebsites.net/?defaultLanguage=es

And you must see something like this:

In this front you can check the operations described in the last points. For example, if you want to locate the POI in Serrano Street 92, you can make the search in the searching box.

The result of searching is the next:

So, if you delete this POI from the Admin console when you perform the search it mustn´t appear anymore.
